- \* WOOFER UNIT
- \* TWEETER UNIT
- \* SLIDE TYPE LEVEL CONTROL IN EACH PHONE
- \* HI SENSITIVITY
- \* LOW DISTORTION
- \* EASILY CONTROL
- \* WITH CROSSOVER NETWORK

MODEL HPS 7A assures professional monitoring and faithful HI-FI reproduction over a wide range with good frequency response.

The Dynamic Stereo Headphone in the component system is settled by the unit, which is specially designed with woofer and tweeter, as makes experts satisfied.

The disposition of the knob is in well consideration to easily control the level and tone quality of left and right sides. Each level control knob is arranged on left and right cases to be controllable tweeter and woofer.

The slide style "H-type level Control" designed specially is used for the purpose of making the auditory sensation area smoothly.

Woofer unit guarantees plentiful sounds without distortion because of using the roll-edge in high-compliance.

Another tweeter unit is used polyester-film as a diaphragm and added the equalizer in order to make vivid and bright tones.
