THE WORLD'S EASIEST TO USE COMPUTER

Amstrad introduces the NC-100 Notepad, quite simply the world's most easy to use computer. We are so confident that absolutely anybody will be able to use their Amstrad Notepad within just 5 minutes that, if you can't, you'll get your money back - no questions asked. †

- and the press agree.

"I can wholeheartedly recommend the Amstrad Notepad computer to a first time user and, for seasoned users like myself, it is a very useful tool." Practical PC.

"It is a remarkable product....the best introduction to using a computer I have ever seen" E.R.T.

"The Notepad's software is so simple that anyone can use it." The Guardian.

"It is refreshing to find a machine designed for everyone." The Telegraph.

THE USER FRIENDLY COMPUTER FOR EVERYONE

"I'd never be able to use a computer."

"Computers are just too expensive."

"I don't see why I need a computer".

These are common reasons for not owning a computer. You may think computers are just too complicated, or that they cost too much, or simply that there is no good reason to buy one..

Now all these objections, and many others, are swept away with the launch of the Amstrad NC-100 Notepad, the computer for everyone. Whether housewives, students or businessmen, literally anyone using the Notepad soon finds they can't be without it.

40 HOUR BATTERY LIFE

Powered by 4 standard AA size batteries for over 40 hours, or from the mains, the NC-100 Notepad features a full-size keyboard, and yet is a lightweight, fully portable unit. This means that letters, reports, memos, essays and notes can be typed no matter where you are - in the office, on the move, at school or at home. Printing is easy too - the NC-100 Notepad will link up with almost any printer via its standard interfaces.

Also, there's no longer any need to carry around your address book or diary. The NC-100 Notepad will keep all your appointments and remembers addresses and telephone numbers for you. What's more, it's a calculator and even an alarm clock as well.

PERFECT FOR EDUCATION

The NC-100 Notepad is particularly suitable for students of all ages. As well as being ideal for note taking and essay writing, it also includes a built-in BBC compatible Basic, which is the most popular programming language used in computer courses at schools.

Unlike most expensive computers, there's no need to worry about inserting disks or waiting for programmes to load. Just switch on the NC-100 Notepad and you are immediately ready to start. All your information is automatically stored in the Notepad's own memory. Standard plug-in memory cards are also available in case even greater storage is needed.

For people who already use a computer, transferring information to or from the Notepad is yet again the easiest of jobs via the standard serial port and built-in communications software.
